DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 5-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shibahashi et al (5,558,700) in view of Nakasuji et al (4,028,118) and Melvin et al (5,779,562). Shibahashi discloses a thermochromic paint composition for determining temperature applied to balls but does not specifically cite golf balls (col. 16). Nakasuji teaches thermochromic material may include liquid crystals or leuco dye. Melvin teaches a four piece golf ball which inherently includes a paint layer. One of ordinary skill in the art would have modified the ball cited in Shibahashi with a golf ball for enhanced playing features.
